2015 UIILI LABMEETING

The present membership represents over one thousand laboratories offering a diverse range of laboratory testing and consulting services. UIILI has members throughout Europe, North- and South America, Africa and the Middle and Far East.

Dear Sir or Madam,

It gives me great pleasure to welcome you at the '2015 UIILI LABMEETING' that the International Union of Independent Laboratories (UIILI) organizes on September 17th, 2015 in Buenos Aires, Argentina.

The '2015 UIILI LABMEETING' should be seen as an initiative to raise awareness for the importance of the laboratory industry societal level. From this perspective, it also forecasts composite talks: many social and economic aspects of laboratory testing do pass in review by prominent speakers from around the globe.

I express the expectation that the '2015 UIILI LABMEETING' will give a valuable contribution to the image and authority of the laboratory sector.

I refer to the website of UIILI (www.uili.org). There you can find all information and documentation concerning our LabMeeting.

UIILI members, laboratory suppliers and other interested organizations I would like to welcome at our event.

I expect that our conference will be a success. A success would be if industry and commerce, government and public organizations, academia and healthcare realize that the laboratory world is a vital and innovative industry, providing a solid foundation for our knowledge, and that it adds value by being objective and inexorable to comment on quality and durability, and hence may be seen as a guarantor of welfare and safety.

Yours sincerely,

UIILI - Union Internationale des Laboratoires Indépendants

On behalf of the Governing Board,

Dr. M. Fernandez Alonso
13th UIILI President

The Union Internationale des Laboratoires Indépendants (UIILI) is an international organization representing the laboratory industry. Established in 1960, UIILI membership includes over 1000 laboratories through Member Associations as well as individual unaffiliated Members.

UIILI LABMEETING WELCOMES:

REGISTRATION

Interested parties can register until September 1, 2015 as a participant through online registration form via the website CALIBA: www.caliba.org.ar or by sending an e-mail to the CALIBA secretariat (info@caliba.org.ar).

ABOUT UILI

The Union Internationale des Laboratoires Indépendants is the worldwide organisation for independent testing and calibration laboratories and for independent consultancy organisations.

Besides receiving regular information on developments of interest to members, their interests are represented at international forums such as ILAC, ISO and UNIDO.

The Union Internationale des Laboratoires Indépendants was registered in France in 1961 as an international association of independent laboratories and consultants. UILI operates under the terms of its Constitution adopted, under its current form, by the 21th General Assembly held in Brussels on September 7, 2007.

A Governing Board, elected by the Ordinary Members through their Member Associations, exercises policy control over all UILI activities. Independent Laboratories and consultants may enjoy membership of UILI either through membership of a Member Association, itself being recognised by UILI, or by individual non-affiliated ordinary membership.

The Constitution permits ordinary membership within a country that has a recognised Member Association. In addition, to accommodate the breadth of scientific disciplines that seek membership of UILI, the constitution permits more than one Member Association per country.
